Data Analyst

November 2024 – February 2026 AMMANN KENZAM (Pty) Ltd, Junior Data Analyst - Delivered data-driven insights to support operations, sales, and inventory management for bitumen storage tanks and specialized equipment. Analyzed performance, sales trends, and operational metrics to optimize processes and guide strategic decisions. Built automated data pipelines and interactive dashboards to improve reporting efficiency, visibility, and decision-making.

- Conducted **web scraping** to monitor market trends, competitor pricing, and activity, providing real-time intelligence for competitive positioning.
- Developed interactive dashboards in Power BI/Tableau to visualize key performance indicators (KPIs) for equipment performance and sales pipelines, improving data accessibility for stakeholders.
- Automated data collection and reporting workflows, significantly reducing manual effort while increasing accuracy and timeliness of insights.
- Collaborated with operations and sales teams to translate data findings into actionable recommendations for process optimization.

June 2023 - June 2024: Junior Software Developer, Rysis Software - Responsible for the development and maintenance of web-based applications like Chronodesk and Visibill, with a focus on enhancing the CRM module and collaboration tools. Duties included designing and implementing features to streamline sales processes and optimize task organization. Additionally, I was tasked with integrating new functionalities to improve user experience and performance. My role also involved collaborating with senior developers on new feature implementations and conducting quality assurance testing to ensure the reliability and functionality of Visibill.

- Led development of a key CRM feature that improved customer management efficiency by **40%** for tracking and managing client interactions.
- Collaborated with senior developers to successfully launch a new application version on schedule, delivering high-quality, low-bug code.
- Integrated new functionalities and conducted testing to ensure reliability and optimal performance of the platform.

November 2019 - Current on weekends: Tutor And Administrator, St. Tutors Saturday School - Tutoring Physics and Mathematics to students from grades 10 to 12 and creating a positive learning environment to enhance student performance. Managed daily administrative tasks such as maintaining student records, organizing classes, and developing educational materials to meet diverse learning needs. Collaborated with parents, teachers, and stakeholders to ensure effective communication and smooth educational delivery. Organized and conducted workshops to further engage students and improve their understanding of complex subjects.

- Co-founded the tutoring initiative, supporting **200+ learners**, with **60+** gaining university admission through targeted academic guidance.
- Designed and delivered tutoring programs and workshops that improved student performance in Physics and Mathematics, resulting in multiple top-ten school rankings.
- Managed student records, class organization, and stakeholder communication (parents/teachers) to ensure smooth operations and high engagement.

Bachelor of Science in Information Technology - January 2019 - December 2021

North-West University, South Africa

Certifications - all available upon request

- Advanced SQL for Data Engineering - Udemy
- Implementing the NIST Cybersecurity Framework (CSF) - Udemy
- Introduction to IBM zOS -Mainframe -IBM
- Web Development - IBM
- API - IBM
- Agile Intro IBM
- GIT - IBM
- Better Business Writing Skills - Udemy
- The Project Management Course- Beginner to PROject Manager - Udemy

Personal Projects:

British Airways Review: <https://tinyurl.com/3pmcnbay>
